

TRAINING AND CERTIFICATION

Build cloud skills at scale

AWS Skill Builder Team subscription

Scale and speed up your cloud transformation with an AWS Skill Builder Team subscription

Equip your team to build in AWS Cloud through continuous training

Creating solutions with AWS Cloud, paired with AWS training, can lower costs, allow you to innovate faster, and make your organization more agile. The experts at AWS understand these benefits, and have built AWS Skill Builder Team subscription to allow you to:

- ✓ Scale and assign training across your organization through an administrator dashboard.
- ✓ Unlock 125+ self-paced, guided labs with no additional fees.
- ✓ Incorporate game-based, experiential learning to keep training engaging and fun.
- ✓ Create team use-case challenges.
- ✓ Leverage curated learning plans that include self-paced labs.
- ✓ Access 600+ digital training courses.
- ✓ Prepare your team to get AWS certified.

Organizations can use Skill Builder Team subscription for their training needs, or as a complement to in-person and instructor-led training available from AWS Training and Certification, and AWS Partners. Secure diverse training experiences to ensure your teams can learn the way that suits them the best.

Whether your team is just starting their cloud journey or diving into specialized skills, unlock the value of AWS by setting team goals, learning together, and developing hands-on real world capabilities. Deepen your team's expertise to improve your total cost of ownership and innovation on AWS Cloud.

234%

AWS Training and Certification delivered a 234% ROI, as quantified by Forrester, by upskilling your existing workforce.¹

“Employees who participate in learning with AWS feel increased loyalty towards their organization, higher morale, more engaged, and a sense of ownership, resulting in reduced turnover rates and longer tenure.”¹

[†]The Total Economic Impact(TM) of AWS Training and Certification, a commissioned study conducted by Forrester Consulting on behalf of AWS, May 2022

Drive organizational capabilities critical to your needs

Administrative tools to build out training for your teams

Assign digital training that will give your teams the ability to reduce complexity, innovate on AWS, and prepare to meet demands specific to your business. Accelerate the skills you need, with 600+ on-demand courses, curated learning plans, hands-on labs, interactive training and AWS Certification exam prep materials.

Provide guidance to achieve learning goals.

Accelerate skills acquisition that teams need by assigning courses and providing curated learning plans.

Scale subscription as needs change.

Invite employees to access their learning experiences on Skill Builder; assign seats and adjust to meet the evolving requirements of your organization. Add or remove learners incrementally or in bulk.

Monitor engagement and adoption.

Review usage report and track learning progress by group or individual.

Get clear visibility on skills progress

Use built-in reports to show course enrollment, progress, completion rates, and more.

Pre-configured dashboards inform at-a-glance on your organization's progress and level of training consumed. Dive deep into a specific user's learning journey, or evaluate the level of consumption of a particular learning experience across your team.

Adjust your training strategy by easily identifying your avid learners and most popular courses. Sort and filter data by users, classes, or progress. Analyze data both online and offline.

“AWS Skill Builder on-demand courses and learning plans have been useful in curating bite-sized content for our engineers. The built-in reports have been very helpful in giving our managers and administrators visibility on our learners’ progress.”

— Jose Dalino, Head of Engineering, Traveloka

Learn by doing with AWS Builder Labs

Interactive, experiential learning

Enable your teams to learn AWS solutions by building them. AWS Builder Labs provide the benefits of hands-on experience that learners can apply right away. These 125+ guided, self-paced labs include interactive exercises with step-by-step instructions.

Get interactive experience.

Learn AWS solutions by building them yourself in a provisioned lab environment.

Learn risk-free.

Experiment in a sandbox environment, without worrying about unforeseen costs or disruptions.

Fit into your schedule.

AWS Builder Labs are available on-demand. Work at your own pace, when and where it's convenient for you.

Unlimited access to 125+ labs

Choose from a variety of topics to build the skills you need for your role or project. Popular labs include Amazon Simple Storage Service (S3), Amazon DynamoDB, AWS Identity and Access Management (IAM), AWS Lambda, and more.

Each self-paced lab covers real-world scenarios built by AWS experts. Select a lab, and start to learn and build in a custom sandbox. Easy to follow instructions help you complete the lab and be ready to face similar use cases for your work. The hands-on experience also prepares you for obtaining AWS Certifications.

“The combination of guided learning and labs makes it easier to apply new skills in real-life projects.”

—John Diket, Software Engineer, Insight

Build in-demand cloud skills with AWS Cloud Quest

Role-based, interactive solutions training

AWS Cloud Quest is the only role-playing game to help your teams build practical AWS Cloud skills. Assign training based on roles, and your teams can jump into the game to learn and apply cloud skills that help the citizens of a virtual, in-game city.

Chart your team's path. Learn by doing. Solve problems. Retain what they learn.

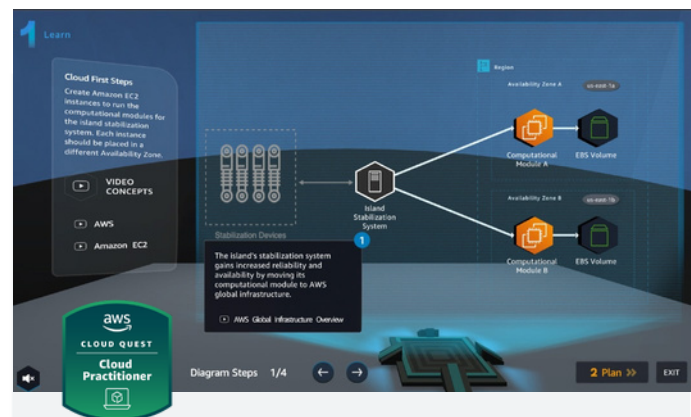

Create personalized learning Teams will practice building Using their wits and Your teams will retain paths for virtual groups, real solutions in a live AWS AWS Cloud skills, your more of skills they have motivate and compete environment—first by teams will work to fix developed with hands-on together with leaderboards, practicing the solution, the city's problems. exercises specific to and track progress with a then building it themselves. each role. real-time insights dashboard.

Play to learn the skills your team needs

- **Cloud Practitioner.** Learn cloud fundamentals, then deepen your knowledge.
- **Solutions Architect.** Build secure, fault tolerant, and highly available AWS solutions.
- **Serverless Developer.** Create modern applications using AWS serverless technology.
- **Machine Learning Specialist.** Dive into AWS machine learning and artificial intelligence.
- **Security Specialist.** Use AWS security services to build solutions that respond quickly to incidents, detect vulnerabilities, and more.
- **Data Analytics Specialist.** Use AWS Analytics services to deploy solutions powered by scalable data lakes, data warehousing, big data analytics, real-time data ingestion, and more.

Once learners finish all the assignments in their roles, they can showcase their achievement with an official AWS digital badge.

“AWS Cloud Quest is very popular with our team. This is a fun and interactive learning tool that allows our engineers to practice AWS skills, gain confidence, and experiment in the AWS Cloud environment prior to solving real-life problems while upskilling themselves.”

— Minoo Gupta,
Sr Director Engineering Operations, Citrix

Tackle cloud challenges with AWS Jam events and Jam Journey

Learn, compete and celebrate as a team

Offer your team a new way to develop expertise and work together. With AWS Jam events, your team collaborates to solve challenges fostering shared learning, creativity, and trust. Teams vie to win points for the top spot on a leaderboard by completing hands-on challenges on a variety of topics in a sandbox environment.

Build skills by confronting challenges.

Jump into unique and engaging learning experiences covering a variety of AWS services through open-ended, real-world scenarios.

Motivate with friendly competition.

Work to complete challenges across common AWS use cases and operational tasks to earn points. Compete with rivals for the coveted top place on the leaderboard.

Validate your performance.

Get points for solving challenges using AWS provided infrastructure according to established best practices. Compare your performance against your peers.

Explore on your own with AWS Jam Journey

Whether you are brand new to AWS, or have never used a specific AWS Service before, Jam Journey can help.

Work independently to solve a series of time-bound challenges, targeted to a specific focus. Jam Journeys are open-ended and do not come with instructions, however clues are available to help navigate if needed. Advance your cloud adoption journey by solving challenges designed to teach AWS best practices around security, migration, dev-ops, AI/ML, and more.

“AWS Jam gives our learners a chance to deepen their skills by leveraging social learning via team-based challenges and competitions.”

— Dorothee Garth, Director of Technology Operations, Zalora Group

Deepen expertise to create industry solutions with AWS Industry Quest

Industry-specific, immersive learning

AWS Industry Quest is the first digital cloud training from the experts at AWS that uses interactive, game-based learning to help learners and organizations build industry solutions in the AWS Cloud. AWS Industry Quest: Financial Services is the first of more industries to come.

Industry Quest explores AWS Cloud use cases that are most common to your industry. Teams learn to transform a virtual company into an industry leader building advanced solutions in a risk-free, live AWS environment. Teams unlock office upgrades, earn rewards and share accomplishments on social media with the selfie cam.

Hands-on learning. Face real-world challenges. Build skills efficiently.

Teams learn the concepts, then Teams practice creating advanced solutions in a live AWS environment before with guided solution building most common uses cases for your implementing on the job. assignments they can then apply industry. to their real-world work.

Spotlight: AWS Industry Quest: Financial Services

Jump into a learning experience that teaches how to build solutions for the most relevant challenges in the financial services industry.

This interactive game covers solutions like fraud prevention, grid computing for capital markets, and serverless checking accounts. These solutions help teams develop key financial services cloud skills and solve problems for your organization.

“With AWS Industry Quest: Financial Services, I was impressed by the creativity behind the game and how it flowed. The step-by-step approach to learning was helpful.”

— Daniel Drentin, Sr. Analyst Engineer
National Australia Bank Limited

Validate your team's learning

Prepare for AWS Certification Exams

Give your teams the in-depth training they need to prepare for exam day.

- **Content straight from the source.** We offer high-quality, from-the-source training content. Our courses are developed by AWS experts to help your learners prepare for their exam.
- **Courses.** Exam Prep courses offer your team an end-to-end training experience that prepares them for an exam while also incorporating real-world application; including digital training courses, hands-on AWS Builder Labs, and AWS Certification Official Practice Exams.
- **Practice.** AWS Certification Official Practice Exams are developed using the same process for AWS Certification Exams, simulating the certification exam experience, providing feedback on every answer.

“AWS Skill Builder became my go-to resource that helped me learn, validate my AWS skills, and put them into practice. Practice labs, exam readiness courses, and sample exams made my preparation for certification a lot easier – I achieved my Cloud Practitioner and Solutions Architect – Associate certifications in three months!”

— Ntekaniwa Paul, Network and Technical Support Engineer, Beem

Are you ready to build cloud skills at scale?

With AWS Skill Builder Team subscription, you can:

- ✓ Assign self-paced digital training built by AWS experts to drive the skills you need; with **600+ on-demand courses**, curated learning plans, hands-on labs, and game-based learning tools.
- ✓ Provide teams with interactive, live AWS sandbox environments to develop practical skills with **AWS Builder Labs**.
- ✓ Develop the expertise of key roles within your organization with game-based learning in **AWS Cloud Quest**.
- ✓ Build problem-solving skills as a team with open-ended cloud challenges in **AWS Jam events** or individually with **Jam Journey**.
- ✓ Help your teams build skills specific to your industry's critical use cases with **AWS Industry Quest**.
- ✓ Validate team learning with **exam prep for AWS Certification**.

“AWS Skill Builder Team subscription allows us to deliver structured training to ensure the scale we need to train hundreds of people with minimum oversight and resources.”
