The screenshot displays the BizPortal web application interface. It features a navigation menu at the top with categories like Home, Sales, Finance, HR, Marketing, Operations, Customer Support, and Management. The main content area is divided into several sections: a 'Calendar' view for 2009, a 'Project Tracking' section with a list of project items, and an 'Issues by Category' section with a 3D bar chart. Three yellow callout boxes highlight key features: 'Share' points to the 'View All Site Content' link, 'Drive' points to the 'Project Documents' section, and 'Measure' points to the 'Issues by Category' chart.

Customer testimonials

“ We are delighted with the SharePoint Intranet solution that Inspired have put in place for us. We maintain customer documentation, legal, business plan, technical, financial and HR documentation, on our intranet for each of our team to access easily. We have no backup or security issues to worry about. We often launch our sales presentation from our intranet on a potential customer's own PC. This means that we don't always need to have laptops with us out on client visits.”

said **Ciaran McGowan, Managing Director, Staff Balance Ltd.**

“ Fast response, rapid implementation, I needed a central location for all our documentation associated with each product we bring to market. Inspired implemented their BizPortal solution, I can now access all information about each product in one web page and I have confidence that the entire product team are accessing the latest version.”

said **Maurice McMullin, Product Management Director, Asavie Ltd.**

“ Amazing value, BizPortal from Inspired has helped me to run my day to day sales process and gives my management team greater insight into how our company is performing.”
