

CommVault 7 System Administration Course

Course SSC003 Three Days; Instructor-led

Introduction

This course provides students with the knowledge and skills necessary for administration of users, tasks, clients, libraries, and media using the CommCell Console interface for the CommVault Common Technology Engine (CTE). Practical examples and “Hands-on” labs are used to reinforce the concepts in this course such as the basics of CommCell Console navigation, user administration and security, client and storage policy configuration, library and media management options, task management, restore procedures and options, and overall system monitoring. While the course uses the most recent available version of the software, the presented concepts and best practices are applicable to all supported versions.

Prerequisites

Attendees require an Administration level of understanding of Windows 2000/2003 Server.

Course Outline

Module 1: Introduction

- Course Concept
- Training Environment
- Terminology Used

Module 2: User Administration

- Managing User Access
- Setting System Options

Module 3: Library Management

- Understanding Library Types and Options
- Configuring Magnetic Libraries
- Configuring Removable Media Libraries
