

Lotus Domino 7 System Administration Operating Fundamentals

Ss0901: One day; Instructor-led

Introduction

This course introduces students to basic concepts that provide the foundation for Lotus Domino and Lotus Notes. This course is the point of entry to the entire core system administration curriculum. This course does not teach students how to install, configure, maintain and troubleshoot a Lotus Domino 7 infrastructure.

Audience

The target audience for this course is system administrators new to Lotus Domino who need to acquire a foundational knowledge and working experience with the Lotus Domino 7 administration tools.

Prerequisites

The prerequisites for this course include previous experience as a network administrator or mail system administrator, and experience using the Lotus Notes 7 Client.

Course Outline

- Examining the Lotus Domino and Lotus Notes architecture
- Defining Security mechanisms
- Recognizing the elements used for Domino security:
 - Defining Mail Routing in Lotus Domino
 - Examining Replication
- Extending Lotus Domino and Lotus Notes beyond the single server
