

Lotus Domino 7 Administration: Building the Infrastructure

SSO902: Two Days; Instructor-led

Introduction

Students will install and configure a basic infrastructure with a single domain using an existing deployment plan. Students will also set up replication and mail routing in the single-domain Environment.

Audience

The target audience for this course is system administrators new to Lotus Domino who are responsible for:

- Initial installation and setup of a basic Lotus Domino and Lotus Notes 7 infrastructure.
- Set up of Domino Mail servers in the corporate intranet and extranet (i.e. Internet) environment.

Prerequisites

The prerequisites for this course include completion of the *IBM Lotus Domino 7 System Administration Operating Fundamentals (N7D750)* course or equivalent knowledge, skills, and experience.

Course Outline

- Planning a basic Domino infrastructure
- Installing and setting up the first Domino server and administrator
- Setting up servers in the Domino domain, including:
- Adding Notes workstations to the Domino domain, including:
- Setting up the administration environment, including:
- Setting up the replication schedule to synchronize Domino system databases in the domain
- Configuring intranet Domino mail routing, including:
- Configuring internet mail routing, including:
- Enabling message controls, including:
- Enabling server and messaging monitoring, including:
- Troubleshooting common mail setup problems
