

## **Lotus 7 Developer: Foundation Skills**

SSO903: Four Days; Instructor-led

### **Introduction**

The course provides the information that developers need to know to successfully create and modify database applications in IBM Lotus Domino Designer 7. It provides an overview of the Lotus Domino 7 and Domino Designer 7 environments, introduces the elements and skills that are used in creating single-database Domino applications, describes how the formula language can be used to enhance the functionality of a Domino application, and explains how Domino applications can be secured.

### **Audience**

The target audience for this course is application developers who are new to developing Domino applications and who need to acquire the fundamental skills to develop and modify single database applications in IBM Domino Designer 7.

### **Prerequisites**

The prerequisites for this course include experience using the IBM Lotus Notes client, Web browser or both to access applications.

Recommendation: Experience developing one or more applications using other application development tools.

### **Course Outline**

#### **Exploring Lotus Domino 7 and Domino Designer 7**

- Creating a Single Database Application
- Adding functionality to the application with the formula language
- Planning and Applying Security
